**Research Interests.** My interests lie in the theoretical foundations of machine learning, with a focus on developing principled approaches to learning under uncertainty. My work explores continual learning, bounded rationality, epistemology, and subjective perspectives on probability theory.

## Education

- 2024–2028 **Ph.D in Machine Learning Systems**, UNIVERSITY OF EDINBURGH.  
Advisors: David Abel, Amos Storkey.
- 2019–2023 **MEng Electronic Engineering with AI**, UNIVERSITY OF SOUTHAMPTON.  
*First Class Honours*  
Advisors: Jonathon Hare, Geoff V. Merrett  
Thesis: *Improving Inference Efficiency with Dynamic DNNs*  
Thesis: *Detecting, Mapping, and Verifying Signage*

## Professional Experience

- Spring 2024 **Senior Research Assistant**, [project page](#), UNIVERSITY OF SOUTHAMPTON.
- Summer 2023 **Data Science Intern**, [hackathon](#), CIRIUM, RELX GROUP.
- Summer 2022 **Undergraduate Research Scholar**, [project page](#), UNIVERSITY OF SOUTHAMPTON.

## Awards

- 2024 EPSRC Machine Learning Systems Scholarship
- 2022 Undergraduate Research Scholarship
